# A hands-on teaching solution for STEAM

“Our students are obsessed! The set is officially the favorite material in the classroom. I have loved the lessons and the more we have done, the more in depth I see the kids getting with their independent exploration.”

**Kate Leis,**  
**Preschool teacher, USA**

# Learning STEAM through play

STEAM Park by LEGO® Education builds on every child's natural curiosity and desire to create, explore and investigate. STEAM Park enables preschool teachers to bring STEAM to life in their classroom with endless versatility, creativity and lots of learning through play.

On every visit to STEAM Park, children use their natural instincts to explore, experiment, observe and play, as they create theme park rides, games and scenes together. Each area of STEAM is introduced in our engaging, hands-on style, to support teachers and engage children as they navigate the exciting world of STEAM together.

## KEY LEARNING VALUES

- Cause and effect
- Observing and describing
- Problem solving
- Developing imagination
- Creating representations
- Role play and collaboration

# Building STEAM vocabulary

Making predictions

Spatial awareness

Movement and motion

Gears

Probability

Cause and effect

Role play

Balance

Art and creativity
